## **Facebook grants \$200,000 for CTE**

CCHS hosted a Career and Technical Education Expansion Celebration this morning and announced a \$200,000 grant from Facebook to expand our Career and Technical Education programs at CCHS and Pioneer! The grant will fund equipment such as butcher-block tables and a pizza oven for the culinary and hospitality pathway; a welding machine and metal-cutting chop saw for agriculture; a planer, sanders and field cameras for natural resources; a “manikin” body simulator and human muscle model for health services; robotics, technology and coding computer science classes; business software and a beverage maker for business; an iMac computer lab and software for graphic design; and a computer numerical control machine and generators for manufacturing and engineering.

Facebook Community Development Regional Manager William Marks had to take a selfie during the ceremony.

Two robotics students designed and built a VEX Robot to deliver the grant announcement.

Dr. Sara Johnson, Board Chair Scott Cooper, and Facebook Data Center Site Manager Andrew Gold cut the ribbon to the new STEM lab that features Mac computers.

Thank you, Facebook, for being our friend.
